

# Sunnen SH-4000 with Collaborative Robot

A new partnership with HTE Automation's Collaborative Robot (Cobot) takes the Sunnen SH-4000's flexibility to the next level. Combining the Cobot's easy programming with the flexible precision, ease-of-use and quick setup of the SH-4000 reduces the need for intervention, saving both time and money, while maintaining consistent part geometry.

## Key Features & Benefits

- Easy to learn robot programming
- Fast Set-up
  - Easy to unpack, mount, and program after completion of UR Academy training
- Safe & Collaborative
  - Customizable stopping times and stopping distance
  - Collision detection
  - Guarding not necessary with safe speed operation
- Flexible
  - Plug-and-play cutting edge products
  - Lightweight and easy to relocate
  - Mounts in any orientation
  - Saves programming to redeploy to new tasks
- Fast Return on Investment
- Training & Support
  - 3 tiers of technical support available from Universal Robots (UR Care)
  - Training courses and videos available from UR Academy Training
